Tile colours shown of the tile product on this data sheet are as accurate as the limitations of the printing process will allow. Due to the manufacturing process of all floor tiles there may be analy variations in sip resistance. The slip resistance values provided are accurate at the time of testing and represent the standard production value. Please note, Inadequate cleaning and maintenance will lead to as all variations in the slip resistance of the slip resent is allow of the slip resent as a slip of the slip resent as a slip of the slip resent of the slip resent as a slip slip potential. Z5 – 35 slip leads an odders to slip potentia and 36+ represents a low slip potential. All rights reserved.
