SUSTAINABILITY | TRENDS | PRODUCT

2020 was a challenging year to say the least and with so much change and uncertainty impacting our lives right now, it can be hard to even look ahead, let alone plan ahead. COVID-19 has dramatically changed the way we live so it's not surprising it is already having a huge influence on the way we design. We are re-imagining how we use and design interior spaces, and have time to collaborate, seeking inspiration from emerging trends and key colour palettes. Head to page 10 for our latest trends and colour inspiration for 2021. We start this issue with a feature on our sustainability story.

VALUED OR WASTED?

4 PERSPECTIVES ON MAKING A SUSTAINABLE IMPACT

| DEZEEN | MATERIAL LAB | JOHNSON TILES |

Building a sustainable business from the inside out has been our passion for the last two decades. As we have assessed and developed our operations to reduce our environmental impact, we faced our own unique challenges along the way. This concept of moving towards a more sustainable future formed the basis of the live panel discussion we participated in recently.

Hosted by design studio Material Lab and moderated by Dezeen's founder and editor-in-chief Marcus Fairs, the conversation explored the journey to a more conscious, less wasteful future with esteemed experts from across the surface design industry. The full talk is available on Dezeen's YouTube channel.

SUSTAINABILITY
(noun)

'avoidance of the depletion of natural resources in order to maintain an ecological balance.'

KATIE TREGGIDEN

| AUTHOR | DESIGN |

Katie Treggiden, a published author championing a circular approach to design. Katie's book *Wasted: When Trash Becomes Treasure* engages with the work of several different designers to explore how reimagining waste and by-products as raw materials for other systems can be beneficial in transitioning to a circular economy.

LAY KOON TAN

| ETHICAL | NATURE SQUARED |

Lay Koon Tan, co-founder of ethical design brand Nature Squared, a featured designer in Katie's book, focuses on the ethical implications of sustainability. This approach examines the social aspect of sustainability: sourcing materials that are environmentally friendly, but also considering how to benefit the local communities they are sourced from.

JASON BRIDGES

| PROCUREMENT | PRODUCTION |

Jason Bridges, Johnson Tiles' Head of Procurement & Production, brought to the fore the challenges that we have faced over the last two decades becoming sustainable, with a particular focus on our recent mission to eradicate single-use plastics from our packaging. Head to page 6 to find out more.

WILLIAM CHIZHOVSKY

| GOOD PLASTIC | RECYCLED |

William Chizhovsky, founder & CEO of The Good Plastic Company, investigates how we can reduce the problem of the 400 million tonnes of plastic waste that are generated annually. The Good Plastic Company produces recycled plastic sheets which can be recycled easily, extending their useful life.

BACK TO BASICS

| ENVIRONMENT | RECYCLING | INITIATIVES |

Today it's expected that UK manufacturers have a working, continuous, 'green policy' in place. However, we have been at the forefront of sustainable manufacturing for over 20 years, before sustainable development ever became the focus it is today.

We have an integrated approach with pioneering green initiatives. Every aspect of our business, from water and lighting, to heat, and even pallets and packaging, is subject to the strict Environmental Policy. Our suppliers are also included within this policy, and must demonstrate their own sound environmental practices in order to secure our business.

SUSTAINABILITY

(noun)
'avoidance of the depletion of natural resources in order to maintain an ecological balance.'

RAW MATERIALS

| RECYCLED | CLAY | CERAMICS |

Each year we recycle 14,000 tonnes of ceramic waste from our own production processes. The ceramic waste is ground to a suitable size and added to the standard ceramic materials to create our tile body. These recycled materials comprise on average 10-15% plus approx. 5% of clay scraps. Recycling the 14,000 tonnes of ceramic waste annually saves 16,800 cubic metres of landfill. It is estimated that 235,000 miles of HGV journeys per year using 133,750 litres of diesel (360 tonnes of CO₂) are saved on the transportation of raw materials with this recycling system.

PACKAGING

| PALLETS | SHRINK-WRAP | RECYCLABLE | PLANT BASED |

Used pallets are utilised within the factory and for deliveries. We purchase second-hand pallets and also repair damaged pallets wherever possible – annually this saves 1,250 tonnes of virgin timber – approx. 10,000 trees. Any pallets beyond repair are segregated and sent for chipping so that the material can be recycled into products such as chipboard.

We have now removed all plastic shrink-wrap found on our product boxes. All boxes now consist of recyclable corrugated card only. We have also replaced all of the PP strapping used with a corrugated card version, as well as substituting all LDPE plastics used for pallet stabilisation with a new product derived from sugar cane.

RECYCLABLE

(adjective)

'a substance or object that can be recycled.'

ENERGY

| RECOVER | RE-USE |

Since the re-siting to our new single-fired production plant in 2001, our annual energy consumption has dropped from 195 million kWh of energy to 130 million kWh whilst our production has risen from 53,000 tonnes in 2001 to 56,000 tonnes of ceramic tiles in 2019. This is an energy-saving of 35% per tonne of ceramic tile and equates to 68 million kWh per year.

This has been supported by speeding up our kilns, using automatic light sensors and re-using kiln exit heat, to cut our energy consumption even further. The recirculation of heat in our kilns saves around 9% of our gas consumption.

We are also the only UK tile manufacturer to use the most energy-efficient production process of a single fire.

WATER

| RE-USE | RECYCLE |

In our body preparation areas, we re-use 32,000m³ of water per year (30% of the total factory water usage). We have also removed water from another part of our production process which saves an additional 2,100m³ of water usage.

EMISSIONS

| ENVIRONMENT | INITIATIVES |

We have incorporated numerous changes to our operation which have seen a saving of 1,700 tonnes of CO₂ emissions per year since 2001.

ULTIMATE GRAY & ILLUMINATING

| PANTONE | COLOUR OF THE YEAR | 2021 |

A marriage of colour conveying a message of strength and hopefulness that is both enduring and uplifting.

Ultimate Gray is the colour of strength and reliable elements with an everlasting firm foundation.

Illuminating is a bright and cheerful yellow sparkling with vivacity, a warming shade which evokes the senses.

These colours work independently but, when together create an aspirational look filled with optimism.

ULTIMATE (adjective)

'being the best or most extreme example of its kind.'

ILLUMINATING (verb)

'make (something) visible or bright by shining light on it; light up.'

SERENITY

| JAPANESE | BALANCE | CALM |

Serenity encourages a natural rhythm and balance to modern life, having massive influences from Japanese culture and traditions. Shape and pattern will have links to Origami folds and concertina folds, simple in form with having a "less is more" approach. Hand-crafted aesthetic are central to this trend. Colours are captured on a spectrum scale, showing earthy neutrals with a deep terracotta and moving towards deep blue/green tones creating calm sensations.

ASTRAL

| SPIRITUAL | ENGAGING | MINDFUL |

Exploring mindfulness and spiritual roots makes the foundation for the Astral trend with a seductive colour palette, focusing on strong earthy tones balanced with rich indigos and deep purples. Rich luxury materials and surfaces provide a hint of glamour, creating a positive and engaging aesthetic for any space.

NATURE INSPIRED

| FOLIAGE | NATURAL | RAW |

'Nature Inspired' still remains a key décor trend for 2021, with the main focus on bringing the outside indoors. Taking inspiration from natural materials, colours and plants to create a harmonious mix for any space. We will see foliage decor move to a more stylised and loose approach.

This season's palette is given a slight edgy feel according to Pantone's key colours to watch. Military Olive has mossy green at its core, but benefits from an injection of maturity and Ultramarine Green elevates a seaweed-esque tone to a stronger, more confident shade.

TREND MODERN MIX

| NOSTALGIC | GLAM | ECLECTIC |

One trend that has left a strong impression upon the fashion industry and now in interior design is the nostalgic comeback from the 70's with a modern twist, and this will see a huge increase for 2021.

Many ranges across our portfolio would work well together to create this nostalgic look. Using Avoir pattern floor in a modern colour palette brings this style together, linking back to 70's patterns and injecting some modern twists of colours with terrazzo on the wall. Incorporating a muted colour palette creates a design statement and simplistic furniture captures this trend.

TREND GEOMETRIC

| SHAPE | SYMMETRY | BOLD |

In the world of trends, geometrics have become a permanent staple for years now with hexagons and chevrons still being key. Shapes are more smooth and rounded across all design aspects including furniture. Geometrics will create symmetry and balance within any setting.

SYMMETRY (noun)

'similarity or exact correspondence between different things.'

GEOMETRIC (adjective)

'characterized by or decorated with regular lines and shapes'

SURFACE

| STRUCTURE | DETAIL | TACTILE |

Surface detail continues to push the boundaries across all aspects of interiors, taking inspiration from the trends Nature Inspired and Serenity, architecture and geometrics. All surfaces evoke texture and depth from highly structured to organic raised surfaces.

Key areas to take note for 2021 trends are, sustainability which will be a major factor from the initial design process through to the consumer; Nature Inspired and geometrics remain key influences with soft and rounded shapes, closely linking to the emerging trends, Serenity, Modern Mix and Astral.

Seductive neutrals will be key, with accents of indigo blue and dusty lilac emerging. There will be a deeper understanding and connection with cultures and heritage linking back to the Serenity trend. Texture and surface detail will be key to add layers and interest to a space, capturing a pleasing aesthetic with added depth evoking the need to touch.

OLD HOUSE NEW HOME

| SOUTH LONDON | RESIDENTIAL |

Channel 4's Old House New Home presented by George Clarke, saw the production team head to Addiscombe in South London. Johnson Tiles' Minton Hollins collection complemented the overall palette of fresh greens and yellows – selected to mirror the shades of the parallel garden. Upstairs in the bathroom, Savoy and Devonshire ranges helped create a calming aesthetic with bright blue the chosen hue for the walls, and a lighter, complementary shade and intricate pattern selected for the floor.

POCKET LIVING

| SOUTH LONDON | RESIDENTIAL |

Adding Refinement to London's affordable housing market; delivering on comfort, luxury, and sustainability. London-based affordable housing developer Pocket Living has recently unveiled Phase 2 of their Addiscombe Grove housing development in East Croydon using Johnson Tiles' Refine porcelain in the wet rooms. Designed by award-winning architects Metropolitan Workshop, the Addiscombe Grove site includes 112 one-bedroom homes across 21 storeys. For the wet rooms at Addiscombe Grove, our Refine Dune Natural and Pewter Grip products were selected to create looks of sleek sophistication and calming relaxation. The Grip finish tiles were chosen for the flooring to provide a riven finish with a high slip resistance, with the complementary Natural tiles fitted on the walls to achieve a luxurious yet welcoming look. The porcelain material ensures the tiles are impervious to liquids, meaning they are ideal for a wet room installation.

LONGTON TOWN HALL

| STOKE-ON-TRENT | COMMERCIAL |

Stoke-on-Trent City Council included an allocation of £1.886m in its capital programme to refurbish the ground floor of Longton Town Hall. The aim was to increase footfall to the building by relocating the Local Centre to the ground floor and making a new entrance feature where the market hall attaches to the town hall. Another objective of the project was to make Times Square and The Strand visually more appealing by finding a new use for a previously underutilised public building, thereby boosting the number of visitors to the town centre and market to help make the town centre more viable.

FEATURE

(noun)

'a distinctive attribute or aspect of something.'

HILTON GARDEN INN

| STOKE-ON-TRENT | COMMERCIAL |

As part of an ongoing development to regenerate the city of Stoke-on-Trent, a new project has now been unveiled. Part of the new Smithfield development, the Hilton Garden Inn hotel has recently welcomed its first guests.

As the first of its kind to be built in the area, the exclusive hotel chain required an elegant aesthetic worthy of its brand. To help create this look, our Subway range was specified for the front panel of the main reception desk. As a key part of the initial impression made to visitors and guests, our Subway tiles showcase a signature dome, delivering character that pairs well with the modern décor of the hotel.

Our Prismatics range also feature in the hotel's bathrooms, making a simple yet stunning statement. The bright white tiles work beautifully with the room's features to create a clean, modern look, in keeping with the theme of the hotel.

MODERN
(adjective)
